SUMMARY

From the moment I first wrote "Hello World" on my first .js file I was hooked into software development. As time went by, what started as a simple console.log() ended up being something I became really passionate about and strive towards improving everyday. Below you'll find projects I've completed that showcase my skills and general background in developing software.

SKILLS

Technical Skills

HTML - CSS - JavaScript - TypeScript - MongoDB - Express
- React - NodeJS - Firebase - Git

Soft Skills

Organization - Time management

PROJECTS

Instagram Clone — HTML, CSS, JavaScript, React, Firebase

- Designed and built a social media app where users can follow each other, post, like, save posts and comment.
- Firebase was introduced as a backend service to implement user authentication.
- Firestore Database was incorporated to store users and posts which were displayed to the user through an UI built with React and MaterialUI.

Pokemon Memory Game — HTML, CSS, JavaScript, React

- Developed a browser game for users to test their memory.
- React was implemented to fetch information about 21 pokemons from the PokeAPI and displayed to the user as cards.
- The user has to click on each pokemon once and the cards swap places. If the user clicks twice on the same pokemon, they lose.

WORK EXPERIENCE

Multiple health facilities, Rosario — Intern of Physical Therapy. 2019 - 2022

- Collaborated with different health care physicians to ensure an interdisciplinary approach on each and every patient.
- Analyzed an assessed gait and posture of over 100 patients to gain insight over the origins of different types of biomechanical anomalies
- Organized and guided group sessions of physical therapy with over 15 people per group in a psychiatric hospital. Provided a safe space for patients to work together, build morale as well as relationships.

EDUCATION

The Odin Project — Web Development. 2021 - 2022

Universidad del Gran Rosario, Rosario — Lic. en Kinesiología y Fisiatría. 2017 - 2022
